

Name.....

Psychology homework (due Tuesday 27th September). Interview 4 people about their phobias (everyone has them, find people that will admit to them. The more weird the better!)

Name of participant	Phobia	Any childhood memories or traumatic experiences of this thing?	Any logical reason why this thing should be scary (heights – you can fall and die, spiders – some are poisonous, dark – predators/muggers/rapists come out at night)
